Arm Sleeve

Order/Reorder Form

All measurements taken with no tension and in centimetres only.

Shoulder attachment options

Bra Loop

1. Distance last arm tape to inside edge of bra strap.

Female Body Strap

2. Top of shoulder **circumferentially** under opposite breast.
2a. Distance last arm tape to base of neck.

Male/Child's Body Strap

3. Top of shoulder **circumferentially** under opposite axilla.
3a. Distance last arm tape to base of neck.

Waist Attachment

4. Top of shoulder diagonal to waist.
4a. Distance last arm tape to base of neck.

Arm sleeve definition, hints and tips

- Standard Arm Sleeve:** This will automatically include soft elastic at the proximal end.
- Elbow Contracture Seam:** Measure as for a regular sleeve, then record the elbow contracture angle in the space provided. A photograph is also useful.
- Stump Sleeve:** Apply measuring tapes to extend as far distally on the stump as possible. A photograph of the stump with the tapes in place is required.

Arm measuring tips

With the arm straight and horizontal, proceed measuring using a **Moss** JOBSKIN arm tape.

- For a Full Length Sleeve** begin by securing tape 9 directly around the elbow. The last tape should fall just below the wrist bone (distal to styloid process). Pleating at the spine occurs **ONLY** at the wrist and axilla if required.
- For a Forearm Sleeve** begin tape at wrist and pleat at proximal end if required.

Pleat instructions

When pleating the last tape, measure the distance between the pleated tape and its neighbour from mid point to mid point (see diagram). Measurements must be recorded in centimetres only.

Reading the tapes

Always read along the straight edge and in direction of arrows as indicated below.
